

# Little Hands

## WALLPAPER

---

### SELF ADHESIVE HANGING GUIDE

#### Before You Start

1. **Delivery Check-Up:** Look over your wallpaper package to verify it's all in tip-top condition.
2. **Light It Up:** Good lighting is your best friend. It helps you see what you're doing and spot any issues early.
3. **Warm and Breezy:** Keep the room cozy (at least 12°C or 55°F) with good ventilation.
4. **Label Love:** Hold onto all the labels until the job is done. They're like your wallpaper's ID cards.

#### Surface Prep

1. **Brush Off:** Use a stiff brush to clear away dirt and loose material.
2. **Spotless:** Clean off any marks with a detergent solution and let it dry.
3. **Mold Patrol:** If there's mold or algae, treat it with a fungicidal wash. Let it dry completely.
4. **Patchwork:** Fill any holes or cracks with filler, smooth it out, and let it dry. Patience is key!

#### Applying the Wallpaper

1. **Stick It Up!** Start at the top of your wall. Peel off a few cm/in of the backing and stick the wallpaper to the wall. Smooth out any bubbles with your squeegee as you go.
2. **Work Slowly:** Peel away more of the backing as you work your way down the wall, smoothing as you go.
3. **Smooth Again:** Give the wallpaper one last smoothing to ensure there are no air bubbles or creases.

#### Hanging Method

##### Overlap and Trim

1. **Overlap Magic:** For overlapping, overlap the edges slightly to match the pattern and trim the excess.
2. **Trim Trick:** Use a sharp knife and a straightedge to trim the overlap down the middle. Edges should be neat and aligned.

##### Butt Joint (Side by Side)

1. **Edge Match:** Place the wallpaper edges next to each other with no overlap.
2. **Match Design:** Ensure the design aligns perfectly at the seam.
3. **Smooth Operator:** Use a seam roller to gently press the joint flat and secure.

Have a blast making your space unique!
